1) Describe cloud concepts (25-30)%

JANUARY 2026

Wk-1st Day 001-364

THURSDAY 01

JAN

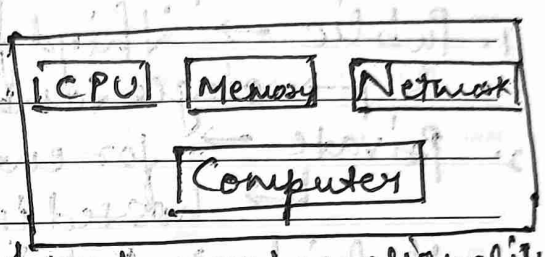

Appointments

8.00 cloud?

9.00 why cloud → data center

10.00

11.00 Virtual machines
Virtualization → stimulates hardware functionality.
Virtualized instances

12.00

13.00 Data center problem → Cap Exp. (CapEx)
Maintenance cost
limited scalability
less accessibility

14.00

15.00

16.00 cloud → operational expenditure (OpEx)
/operational cost

17.00

Disadv → depends internet
privacy & compliance
security

18.00

Shared responsibility
⇒ Service Models
Iaas → VM
Paas → Server, storage, Networking.
Saas → Email, Calendaring, MS office 365 etc.

You must be the change you want to see in the world. – Mahatma Gandhi

02 FRIDAY

Wk-1st Day 002-363

Appointments

8.00

Cloud Deployment Models

- Multi tenant
1. 9.00 Public → third-party Ex:- Azure, AWS, GCP..etc
- single tenant
2. 10.00 Private → for enterprise private cloud.
   - hosted in DC
3. 11.00 Hybrid → Public + Private
   - better control over sensitive data
   - maximum flexibility

12.00

IaaS	PaaS	SaaS
13.00		
Microsoft Azure VM,	Azure Kubernetes	Cyneid, slack,
14.00 Amazon EC2,	services, AWS lambda,	...MS 365 etc.
Google Compute	Google App Engine	
15.00 Engine	Azure Backup	
	Provides	
16.00 More customer	less management	least flexible,
control/responsibility	overhead.	least customer
17.00 + max. flexibility	Ex:- App service	responsibility
	Azure search	
	Azure CDN	

responsible for → configuring SaaS solution.

18.00 Azure Arc - handle multicloud providers

Eve. Azure VMware soln - VMware run inside Azure

JAN 2026

T	F	S	S	M	T	W	T	F	S	S	M	T	W	T	F	S	S	M	T	W	T	F	S	S	M	T	W	T	F	S
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31

Appointments

8.00 Pay-as-you-go → Consumption based Model.

9.00

CapEx → Upfront cost on physical infrastructure

10.00 Ex: Azure reserved VM instances.

11.00

OpEx → cost for services

12.00 ↳ pay as you use

13.00

Scalability — increase resource to handle high demand

14.00

15.00 Elasticity — automatically increase & decrease based on demand.

16.00

Scaling types — → Vertical Scaling (Scale UP/Down) (Bigger Machine)
existing, More CPU, RAM

17.00 → Horizontal Scaling (Scale Out/In)
↳ More Machine
More VM / Containers

18.00

Eve.

Sunday 04

It is during our darkest moments that we must focus to see the light. – Aristotle Onassis

High availability → service available with no downtime for extended period of time.

2 2 2 6

JANUARY

05 MONDAY

Wk-2nd Day 005-360

Appointments

8.00 Predictability → Performance + High availability → Autoscaling, Load balancing

cost → Pricing calculator + multi-tasking tools

9.00

Load balancer → distributes traffic

10.00

11.00 Security →

DDos protection + patching + access control

12.00

13.00

cloud simplifies resource management through automation & monitoring.

14.00

15.00

16.00 Templates → predefined configuration for resource deployment.

(reusable deployments)

17.00

18.00 Management tools :-

- Azure portal
- CLI
- APIs
- Powershell

Eve.

Do not judge me by my successes, judge me by how many times I fell down and got back up again. – Nelson Mandela

JANUARY 2026

Wk-2nd Day 006-359

TUESDAY 06

Appointments

8.00 Sustainability practices → 1. Right-size Resources
2. Automate resource management
3. Optimize resources
4. Monitor usage

9.00

10.00

Common IaaS services:→

11.00

1. Azure VM
2. Azure Virtual Network
5. Azure storage

12.00

13.00

Common Iaas use cases:→

14.00

1. Lift & shift migration
2. Testing & development

15.00

16.00

Paas shared responsibility → Identity & Access
Applications
Network controls

17.00

18.00

Eve. Middleware → Web servers
Application frameworks
Runtime environments

The best way to find yourself is to lose yourself in the service of others. – Mahatma Gandhi.

2026

JANUARY

07 WEDNESDAY

Wk-2nd Day 007-358

Appointments

8.00 Common Paas use cases:— 1. Development framework

9.00

10.00 2. Analytics & BI

11.00 Saas shared responsibility → identity & access

12.00

13.00

JANUARY 2026

Wk-2nd Day 010-355

Azure Architecture & services (35-40)%

SATURDAY 10

Appointments

8.00 Core Azure service :-

9.00 1. compute - VM,
App services
Azure Functions
Kubernetes

10.00

11.00

2. Networking - VNet
Load balancer
VPN Gateway
DNS

12.00

13.00

14.00 3. Storage - Blob storage
File "
Queue "
Managed disk.

15.00

16.00

4. Databases - Azure SQL
cosmos DB
PostgreSql
MySql.

17.00

18.00

Eve.

5. AI + ML - Azure OpenAI
AI services
ML

Sunday 11

S	M	T	W	T	F	S	S	M	T	W	T	F	S	S	M	T	W	T	F	S	S	M	T	W	T	F	S	•	•	•	FEB 2026

Innovation comes from saying No to 1,000 things. – Steve Jobs

2026

12 MONDAY JANUARY

Wk-3rd Day 012-353

Authentication
Identity management
Access control

Appointments

6. Identity & security — Microsoft Entra ID
Key Vault
Defender for cloud.
Firewall.

7. DevOps Management — Azure Devops
Azure Monitor
ARM Templates
Azure policy

8. IOT — IOT Hub
IOT central

9. Analytics — Synapse Analytics
Data factory
Databricks

10. Integration — Logic Apps
API management
Event Grid

Eve. Subscription — logical unit for billing & access control; resource management

↓

billing & access control boundary.

JAN 2026

Strength is Life, Weakness is Death. Expansion is Life, Contraction is Death. Love is Life, Hatred is Death. – Swami Vivekananda

JANUARY 2026

Wk-3rd Day 013-352

TUESDAY 13

Appointments

8.00

9.00

10.00

11.00

12.00

13.00

14.00

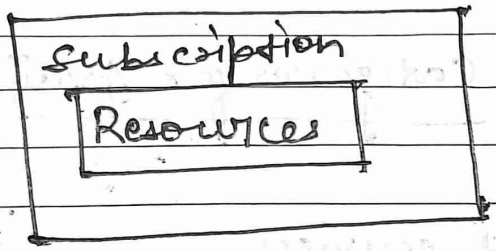

15.00

16.00

17.00

18.00

Eve.

Azure Account

↓

Subscription (diff. subscription)

↓

Resource Groups (diff.)

↓

Resources.

Resource groups — logical container for azure resources

* Azure physical infra →

Geographies → Regions (GRAD). → Availability zones → Data centers

region failure

data center failure

Location where resources are deployed.

separate data center within same azure region. min. 3 AZ.

* region pair → two azure region paired together

S M T W T F S S M T W T F S S M T W T F S S M T W T F S FEB 2026
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28

I have many problems in my life. But my lips don't know that. They just keep smiling. – Charlie Chaplin

14 WEDNESDAY

Wk-3rd Day 014-351

Appointments

8.00 Azure Service Categories for Availability Zones :-

1. Zonal services
9.00 2. Zone-redundant services
3. Non-regional services

10.00

11.00 Zonal services — fixed to one zone

12.00 Ex:- VM,
Managed disks
13.00 Public IP Addresses

14.00 Zone-redundant services — replicated across zones

15.00 Ex:- Zone-redundant Storage
SQL Database

16.00

Non-regional services — Available globally

17.00 Ex:- Azure DNS
Azure Traffic Manager
18.00 Microsoft EntraID.

Eve.

* Sovereign regions — Special compliance-focused azure region. *

If you want to walk fast, walk alone. But if you want to walk far, walk together. – Ratan Tata

Appointments

Azure management Hierarchy.

Centralized governance.

* Management ~~Hierarchy~~ Group

↓

Subscription

↓

Resource Group

↓

Resource

Max. nesting → 6 levels deep (excluding root & subscription levels).

- Each subscription & management group → can have only one parent.

Host Pool - collection of VM that provides desktop session

Session Host - VM that actually owns desktop/application

Knowledge is a tangible asset, quite often the most important tool in your work. – A.P.J. Abdul Kalam

Appointments

Azure VM size families:-

Family	Purpose
B-series	Budget / Burstable
D	General purpose
E	Memory optimized
F	Compute optimized
M	Large Memory
L	storage optimized
N	GPU workloads.

VirtualMachine Scale sets - group of identical VMs

Availability set - VM availability/redundancy inside a region.

Traditional VM	containers
	container platform - docker + used to create containers

Containers - light weight application packages

The best fighter is never angry. – Lao Tzu

Appointments

Azure container services → simple container → best for small workloads

Best for Modern cloud applications — 1. Azure container Instances (ACI) → Paas services
2. Azure container Apps
3. Azure Kubernetes services (AKS)

Managed container

Orchestrate & manage large no. of containers

best for large applications

Microservices - small independent application components

Azure Functions — serverless compute service (event-driven).

- pay only when code executes, not uptime
- automatic scale based on demand.

Trigger — event that starts a function

(default) Stateless

Every execution is independent
No memory of previous execution

Stateful (durable function)

function remembers previous state
used for long processes.

Sunday 18

Every time you smile at someone, it is an action of love, a gift to that person, a beautiful thing. – Mother Teresa

2026

19 MONDAY

JANUARY

Wk-4th Day 019-346

Appointments

8.00 Azure AI services — prebuilt AI Apis

9.00 Azure OpenAI services — Generative AI on Azure

10.00 Agentic AI - AI that performs multi-step tasks.

11.00

Azure ML - custom AI

12.00

Device communication

13.00 Azure IOT Hub - central

14.00 → Secure 2 way connections

→ manage Saas platform

15.00

16.00 Azure IOT Edge - run directly on device instead of cloud (reduces latency & bandwidth)

17.00 → bring cloud processing closer to devices.

18.00

Eve. Azure App service — hosts apps without managing servers.

hosts →

1. Web Apps
2. API Apps
3. Web Jobs - run background tasks & scripts
4. Mobile Apps - mobile backend platform

JAN 2026

T	F	S	S	M	T	W	T	F	S	S	M	T	W	T	F	S	S	M	T	W	T	F	S	S	M	T	W	T	F	S
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31

There are only two ways to live your life. One is as though nothing is a miracle. The other is as though everything is a miracle. – Albert Einstein

JANUARY 2026

Wk-4th Day 020-345 TUESDAY 20

Appointments

Subnet — smaller section of network

Azure Virtual Network (VNet) :—

- private network in Azure
- allow azure resources to communicate securely

8.00 9.00 10.00 11.00 12.00 13.00 14.00 15.00 16.00 17.00 18.00 Eve.

Connect to On-Premises Network :—

1. Point-to-site VPN
   one device ⟶ Azure VNet
2. Site-to-site VPN
   entire office device ⟶ Azure VNet
   uses ⟶ BGP
3. Express Route — for mission critical workloads
   private network route ⟶ Azure VNet
   ↳ does not use public internet.
   ↳ connection is called :— Express Route circuit

Route network traffic :— using
1. Route tables
2. BGP
3. UDR (user defined routes)

Azure allows traffic filtering :—
1. NSG (Network security groups) → control ports connect to VM.
2. NVA (network virtual appliance) → specialized VM performing networking tasks.

Azure firewall rules

Network Level access control

S M T W T F S | S M T W T F S | S M T W T F S | S M T W T F S | FEB 2026
1 2 3 4 5 6 7 | 8 9 10 11 12 13 14 | 15 16 17 18 19 20 21 | 22 23 24 25 26 27 28

Life is what happens to us while we are making other plans. – Allen Saunders

21 WEDNESDAY

Appointments

8.00 * VNet Peering – Connect two VNet privately.

9.00

* Azure VPN – create encrypted tunnel bet^n public networks or devices over the internet
10.00 ↳ allow secure communication bet^n Azure & external networks.

11.00

12.00 Azure VPN gateway – entry/exit point for VPN connecti

13.00 types: 1. Point-to-Site (P2S)
2. Site-to-Site (S2S)
14.00 3. Network to Network (VNet to VNet).

15.00 1. Policy based VPN

16.00 * 2. Route-based VPN → * recommended VPN type.
↳ uses routing tables to determine traffic path

17.00

18.00 High availability options:-

Eve. 1. Active / Standby

2. Active / Active

3. Zone redundant gateway – protected against complete availability zone failure

A day without sunshine is like, you know, night. – Steve Martin

Appointments

8.00 * Express Route
GlobalReach — connect offices through microsoft network.

9.00

10.00 BGP (Border gate way Protocol) → automatically exchanges routing information betn azure & on-premised networks.

11.00

12.00 → support private DNS

Azure DNS :-

13.00 → name resolution service
→ manage DNS through :- Azure Portal
Azure CLI
Powershell
REST API

14.00

15.00

16.00 * Alias records → allow DNS names to point directly to azure resources.

17.00 Ex:- Public IP
Traffic Manager
CDN Endpoint

18.00 Automatic DNS updates

Eve.

DNS record → azure resource

Life isn't about finding yourself. Life is about creating yourself.

2026

JANUARY

23 FRIDAY

Wk-4th Day 023-342

Appointments

8.00 Azure storage

9.00 Services :—

Blob storage - Stores files & unstructured data

10.00 Azure files - shared file storage

asynchronous processing → Queue storage - message queues - 64kb

11.00 Table storage - NoSQL structure data

12.00

Azure storage Account Types :—

13.00 Standard GPv2 ⭐ — default choice / recommended

14.00 → supports — Blob, files, queues, tables

15.00

Premium block blob → Fast blob storage

16.00 Premium files shares → Fast file shares

Premium page → VM Disks

17.00

18.00

Eve.

JAN 2026

T	F	S	S	M	T	W	T	F	S	S	M	T	W	T	F	S	S	M	T	W	T	F	S	S	M	T	W	T	F	S
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31

L Z G G

Appointments

8.00 Storage redundancy options:- → Keeping multiple copies of data to prevent data loss.

9.00 ★ ↳ cheapest

1. LRS - locally redundant storage
10.00 ↳ Keep 3 copies inside same DC. protection against availability zone failure

2. 11.00 ZRS - Zone redundant storage → no protection against regional disaster
↳ Keep 3 copies inside same region
12.00 3 availability zones 1 Region protection (yes)

3. GRS - Geo redundant storage (LRS + second region)
13.00 Primary region - 3 copies (LRS) } 6 copies
Secondary region - 3 copies (LRS) } 2 regions

4. 14.00 GZRS - Geo zone redundant storage (ZRS + Geo-replication)
P.R - 3 copies (ZRS) → highest resiliency. (best protection)
15.00 S.R - 3 copies (LRS) 3 zones + 2 region.

5. RA-GRS - Read Access geo redundant storage
16.00

6. 17.00 RA-GZRS → Read Access geo zone redundant storage

18.00 Note:-
More letters → more redundancy → more availability.
Eve. More copies → More protection → more

Sunday 25

2026

JANUARY

26 MONDAY

Wk-5th Day 026-339

Blob Access Tiers :-

8.00

Hot Tier — frequently used.

9.00

↳ Highest storage cost
lowest access cost
fastest access

10.00

11.00

Cool Tier — accessed occassionally
↳ min 30 days store

12.00

13.00

Cold Tier — rarely used
↳ min 90 days store

14.00

15.00

Archive Tier — long term storage
↳ min 180 days store

16.00

↳ Cheapest storage
slowest retrieval

17.00

18.00

Eve.

*Note :-

↓ Usage decreases :-
- storage cost decreases
- retrieval time increases

Appointments

8.00 Azure Data migration options:-
↳ central migration hubs.

9.00 1. Azure migrate — online migration

10.00 2. Azure Databox — offline migration
(80TB)

11.00 server migration
database "
Web App "

13.00

14.00 Azure file movement tools:-

15.00 1. AzCopy — CLI + one way sync
↳ best for bulk transfer

16.00

17.00 2. Azure storage Explorer — GUI for azure storage
↳ best for easy management (uses AzCopy behind the scenes).

18.00

Eve. 3. Azure file sync → bidirectional sync
↳ hybrid file storage environment.
↳ best for enterprise file sharing.

There is no friend as loyal as a book. – Ernest Hemingway

28 WEDNESDAY Azure File Sync

Wk-5th Day 028-33

Appointments

8.00

Cloud tiering :-

9.00

Frequently used files → local server

Rarely used files → azure cloud

10.00

11.00

Azure directory services :-

12.00

1. Microsoft Entra ID :- (IAM) service in cloud.

13.00

↳ formerly Azure AD.

14.00

15.00 ~~2. Single sign on (SSO)~~

16.00

Authentication
single sign-on
Application management
Device management

17.00

18.00

2. Microsoft Entra Connect :- (Hybrid synchronization)

Eve.

with single identity access both (two separate user accounts) environments.

On premise AD ⟷ (Entra Connect) Microsoft Entra ID

Success is not final, failure is not fatal: it is the courage to continue that counts. – Winston S. Churchill

Group policy
LDAP,
Kerberos,
NTLM
AD as a service

Appointments

8.00 3. Microsoft Entra Domain Services :- manage AD features

9.00 On prem AD

Azure manage domain controllers.

10.00 Entra connect

11.00 Micro. EntraID ← one way sync

12.00 Microsoft Entra Domain services

13.00

Authentication methods :-

14.00 1. Password ← last secure
2. Single sign on
3. MFA ← 2 or more factors

15.00 4. Passwordless ← highest security
highest convenience

16.00

17.00 Microsoft Entra MFA

18.00 FIDO2 — physical security key

Eve. Password less options :-

1. Window Hello for business
2. Microsoft Authenticator
3. FIDO2 security keys.

Live as if you were to die tomorrow. Learn as if you were to live forever. – Mahatma Gandhi

Appointments

8.00 Microsoft Entra External ID — to securely manage external users.

9.00 ↳ 3 major capabilities

10.00 1. B2B collaboration — Guest users
Guest acc. created

11.00

12.00 2. B2B direct connect — Teams shared channel
no. guest acc. created

13.00

3. External ID for customers (B2C)
14.00 ↳ Customer authentication.
↳ best for customer-facing applications.

15.00

→ control sign-in conditions

16.00 Azure conditional access — decision engine.
↳ smart security rules.

17.00 *

Azure RBAC (role-based access control) —
18.00 ↳ control authorization to azure resources
- follow Principle of least privilege - only permission they need nothing more.

Eve.

role - collection of permissions

Nothing is impossible, the word itself says "I'm possible"! – Audrey Hepburn

Appointments

Common built-in roles:-

1. Reader — read only
2. Contributor — manage resources (cannot assign permission)
3. Owner — complete control. (assign RBAC permission)

RBAC scope → Management group - (broadest scope)
↓ Subscription
↓ Resource group
↓ Resource — (smallest scope)

RBAC enforced through ARM (Azure resource manager)

RBAC —control→ management plane
↳ doesn't directly control → Data plane

Sunday 01

2026

FEBRUARY

02 MONDAY

Wk-6th Day 033-332

Appointments

8.00

9.00

10.00

11.00

12.00

13.00

14.00

15.00

16.00

17.00

18.00

Eve.

security model based on

Zero Trust Model - never trust always verify

3 Pillars

1. Verify explicitly
2. use Least privilege Access
3. Assume breach

Defense-in-depth - multi layer security approach

7 layers

Password
↓
MFA
↓
Conditional access
↓
RBAC

1. Physical security - protect datacenter ← outermost layer
2. Identity & Access
3. Perimeter - 1st network defense
4. Network
5. compute - secure resources
6. Application - secure the code
7. Data ← Innermost layer

Azure Key vault → protects secrets & Keys

1. Secrets
2. Keys
3. Certificates

FEB 2026

S	M	T	W	T	F	S
1	2	3	4	5	6	7
8	9	10	11	12	13	14
15	16	17	18	19	20	21
22	23	24	25	26	27	28

Perfection is not attainable, but if we chase perfection we can catch excellence. — Vince Lombardi

Encryption:

2 ways:-
1. Encryption at rest
2. Encryption in transit

TLS/HTTPS ← protocol

Just-In-time access.
(use to)
cloud

detect & respond to threats
secure resource

Microsoft defender for cloud :- monitor & respond to Threat protection service
CSPM + (cloud security posture management).

3 main function:-
1. Assess
2. Secure
3. Defend

Secure score → measurement of your azure security posture.

Azure firewall - cloud native & intelligent network firewall security service.
protect virtual network resources.
→ default → always set to deny.
→ scalable
↓ Stateful

Life is 10% what happens to me and 90% of how I react to it. – Charles Swindoll

Azure management & Governance (30-35%)

Appointments

Factors affect cost in azure:-

1. Resource type
2. consumption
3. Maintenance
4. Geography
5. Subscription type
6. Azure marketplace

Pricing options:-

1. Pay-as-you-go — for unpredictable workloads
2. Reservations — for 1 or 3 yrs, predictable workloads, Largest discount
3. Azure savings plan - hourly spend amount for 1 or 3 years
4. Spot VMs - uses unused azure capacity, best for interruptible workloads.
   - ↓ upto 90% savings
   - ↳ lowest cost, highest cost saving

Inbound data (Ingress) ↔ data into azure (free)

Outbound data (Egress) → data out of azure (charged)

Strength is Life, Weakness is Death. Expansion is Life, Contraction is Death. Love is Life, Hatred is Death. – Swami Vivekananda

2026

06 FRIDAY

FEBRUARY

Wk-6th Day 037-32

Appointments

8.00

Azure Pricing calculator :-
↳ estimate azure costs before deployment (future)

9.00

10.00

Azure cost management :-
↳ estimate after deployment

11.00

↳ 3 main components

12.00

1. Cost Analysis - detect trends
2. Cost Alerts
3. Budgets alert

13.00

14.00

Azure tags (Name + Value pairs)
↳ like label

15.00

↳ provide extra information about resources.

16.00

can
↳ allocate costs to diff. departments

17.00

↳ add to resources
organize resources
track costs

18.00

Eve.

Azure policy - enforce all resource can have tag.
